

## INDEPENDENT AUDITOR REPORT

To the members of African Aviation Pool

We have audited the accompanying financial statements of African Aviation Pool which comprise the statement of financial position as at 31 December 2015, the statement of profit or loss and other comprehensive income, statement of underwriting income, statement of changes in members' funds and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

### **Management Board's responsibility for the financial statements**

The management board is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and the requirements of the African Aviation Pool agreement and for such internal control, as the management board determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's responsibility**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform our audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion**

In our opinion, the financial statements present fairly, in all material respects, the financial position of African Aviation Pool as at 31 December 2015, and of its profit and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the African Aviation Pool agreement.

## NOTES TO THE FINANCIAL STATEMENTS

---

# AFRICAN AVIATION POOL

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2015

### 1 ACCOUNTING POLICIES

#### a) Statement of compliance

These financial statements are prepared in accordance with International Financial Reporting Standards (IFRS).

#### *Early adoption of standards*

The pool did not early-adopt new or amended standards in 2015.

#### b) Classification of insurance contracts

Contracts under which the pool accepts significant insurance risk from another party (the ceding company or cedant) by agreeing to compensate the cedant or other beneficiary if a specified uncertain future event (the insured event) adversely affects the policyholder or other beneficiary are classified as insurance contracts.

#### **Recognition and measurement of insurance contracts**

Short-term insurance contracts are accounted for on an annual basis.

##### i. *Short-term insurance contract premium*

Written premium on short-term insurance contracts comprises premiums on contracts entered into during the year, irrespective of whether they relate in whole or in part to a later accounting period. Premium income for the period includes adjustments to premiums written in prior accounting periods or premium not yet advised by the cedant for contracts in force at the end of the period. An estimate is made at the reporting date to recognise retrospective adjustments to premium or commission.

The outward reinsurance premiums relating to earned premiums are recognised as expense in accordance with the reinsurance services received.

##### ii. *Claims arising from short-term insurance contracts*

Claims incurred in respect of short-term insurance contracts consist of claims and claims handling expenses paid during the financial year as well as movements in premium reserve and claim deposit fund. Outstanding claims comprise provisions for all the Pool's estimated ultimate costs of settling all claims incurred but unpaid at the reporting date whether reported or not and related claim handling expenses. Outstanding claims that have occurred at the reporting date and have been notified to the Pool by the cedants are carried at their face value. Adequate provisions are also made for claims incurred but not reported at the reporting date using best available information. Outstanding claim provisions are disclosed at their carrying amounts and are not discounted except where there is a particularly long period from the claim incident to settlement in which case outstanding claims are discounted using a discount rate that best reflects current assessment of time value of money and associated risks. Anticipated reinsurance recoveries on claims are disclosed separately as assets.

##### iii. *Claim reserve and Premium reserves*

These consist of 100% of estimated losses reported by cedants and premium reserve established at the rate of 30% of the gross premiums. The premium reserve retained is released in the corresponding period of the following year.

# AFRICAN AVIATION POOL

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

### 1 ACCOUNTING POLICIES (Continued)

#### c) Foreign currency translation

##### i. Functional and presentation currencies

The pool's constituent offices are geographically dispersed within Africa, and it conducts its operations in several currencies. In line with IAS 21 revised, the pool has selected a common currency, United States dollars, as its functional and presentation currency.

##### ii. Foreign currency translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income. Translation differences on equities held at fair value through profit or loss are reported as part of the fair value gain or loss.

#### d) Underwriting results

Underwriting results of the Pool are determined by compiling information received from the member insurance companies in returns detailing, inter-alia, premiums, commissions and claims.

The reserves are computed on the basis of the best information available at the end of the reporting period date, including past experience as adjusted for changes in circumstances and information supplied in returns submitted by the member insurance companies.

#### e) Investment income

Investment income comprises interest receivable on term deposits, treasury bills and bonds for the year and is recognised on the accrual basis.

#### f) Investments

Investments comprise equity investments, fixed and floating rate instruments and deposits. At the initial recognition of an investment, management determines its classification, which is dependent on the purpose for which the investment was acquired, and re-evaluates that classification at every reporting date.

#### g) Financial instruments

##### Financial assets – Recognition, classification and measurement

Financial assets and liabilities are recognised when the pool becomes a party to the contractual provisions of the instrument. The pool classifies its financial assets into the following categories:

##### i. Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments and are not quoted in an active market. After initial measurement at cost, receivables are subsequently remeasured to amortised cost using the effective interest rate method, less allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the effective interest rate.

##### ii. Financial assets at fair value through profit or loss (FVTPL)

Financial assets at fair value through profit or loss are those which were either acquired for generating a profit from short-term fluctuations in price or dealer's margin, or are securities included in a portfolio in which a pattern of short-term profit-taking exists. Investments classified as fair value through profit or loss are initially recognised at cost and subsequently re-measured to fair value based on quoted bid prices or dealer price quotations, without any deduction for transaction costs. All related realised and unrealised gains and losses are included in the profit or loss. Interest earned whilst holding held for trading investments is reported as investment income.

# AFRICAN AVIATION POOL

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

### 1 ACCOUNTING POLICIES (Continued)

#### **h) Reinsurance receivables**

All amounts receivable are initially recognised at fair value.

Amounts recoverable under the retrocession contracts are recognised in the same year as the related claims and are disclosed in the income statement and statement of financial position on a gross basis.

Amounts recoverable under reinsurance and retrocession contracts are assessed for impairment losses at each reporting date. Such assets are deemed impaired if there is objective evidence, as a result of an event that occurred after its initial recognition that the pool may not recover all amounts due and that the event has a reliably measurable impact on the amounts that the pool will receive from the debtors.

The carrying amounts of the assets are reduced by the impairment losses and the impairment losses recognised in the profit and loss account for the period.

#### **i) Taxation**

The Pool is exempt from taxation.

#### **j) Cash and cash equivalents**

For the purposes of the statement of cash flows, cash and cash equivalents include short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### **k) Comparatives**

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

### 2 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENT IN APPLYING THE ENTITY'S ACCOUNTING POLICIES

In the process of applying the entity's accounting policies, management has made estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The key areas of judgment in applying the Pool's accounting policies are dealt with below:

#### **(a) Critical judgements in applying accounting policies**

There are no critical judgements, apart from those involving estimations (see b below), that the Management Board have made in the process of applying the entity's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

#### **(b) Key sources of estimation uncertainty**

Claims

A significant degree of judgement has been applied in the determination of the adequacy of provision for outstanding claims and claims incurred but not reported at the reporting date. In addition, the income statement includes estimates for premium, claims and charges data that were not received from ceding companies at the date of the financial statements.

### NOTES TO THE FINANCIAL STATEMENTS (Continued)

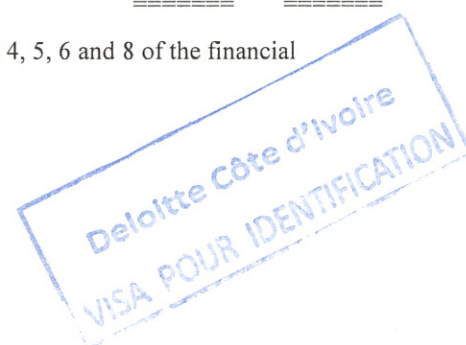

#### 10 RELATED PARTY BALANCES AND TRANSACTIONS

The African Aviation Pool is related to various insurance and reinsurance companies who are members of the African Insurance Organisation. All premium and claims paid as disclosed in the underwriting revenue statement represents related party transactions. In addition, the pool is related to African Reinsurance Corporation as the Corporation is a member of the Pool and also serves as the Pool manager.

Below is an analysis of balances held with the members of the pool and transactions entered into with the members.

	2015 USD	2014 USD
a) Net premium income earned	462,980	926,010
b) Gross claims Paid	1,269,174	1,074,187
c) Commission	155,937	154,772
d) Charges	54,370	84,527
e) Management commission paid to African Reinsurance Corporation	48,331	51,059
f) Key management compensation Management board fees	9,600	4,000
g) Amount due from Ceding Companies	10,817,151	10,861,232
h) Amount due to Ceding Companies	5,406,038	3,928,502

The balances held with related parties are disclosed in notes 4, 5, 6 and 8 of the financial statements

# AFRICAN AVIATION POOL

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

### 11 FINANCIAL RISK MANAGEMENT

The pool's activities expose it to a variety of financial risks, including market credit and liquidity risks. The pool's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on its financial performance.

Risk management is carried out by the management under policies approved by the Management Board. The pool members identify, evaluate and manage financial risks. The board provides the overall principles for overall risk management policies covering areas such as market risk, interest rate risk, and credit risk and investing excess liquidity.

#### a) Market risk

Market risk is the risk that the fair value or cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk reflects interest rate risk, currency risk, and other price risks.

##### (i) Foreign exchange risk

The pool maintains assets and liabilities in several currencies and thus is exposed to the risk of exchange rate movements associated with assets and liabilities matching. The pool does not apply hedging techniques to mitigate its currency risk but ensures the net exposure to this risk is within acceptable levels by constantly reviewing the level of mismatch. The pool has offices in various locations whose currencies, in addition to its unit of account, represent approximately 95% of its business volumes. The assets and liabilities in these currencies are matched to the level desired by the pool.

The pool transacts business with counterparties in a number of countries and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the Euro, South African rand and Nigerian naira. However, the pool's primary exposure is to the Nigerian naira. Foreign exchange risk arises from reinsurance transactions recorded in local currencies, investments in non-reporting currencies and recognised assets and liabilities in foreign operations.

The carrying amounts of the pools's foreign currency denominated monetary assets and liabilities at the end of the reporting period are as follows:

	NAIRA	GBP
<b>2015- Financial assets</b>		
Short term deposits	601,475	
Bank balances	22,539	220,371
	<hr/>	<hr/>
	624,014	220,371
	<hr/>	<hr/>
<b>2014- Financial assets</b>		
Short term deposits	427,122	
Bank balances	202,757	231,657
	<hr/>	<hr/>
	629,879	231,657
	<hr/>	<hr/>

# AFRICAN AVIATION POOL

## NOTES TO THE FINANCIAL STATEMENTS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2015

### 11 FINANCIAL RISK MANAGEMENT (CONTINUED)

#### a) Market risk

##### (i) Foreign exchange risk (Continued)

*Foreign exchange risk – Appreciation/Depreciation of USD against other currencies by 1%.*

The following sensitivity analysis shows how profit transferred to members account would change if the US Dollar had weakened/strengthened against the relevant currencies with all other variables held constant at the end of the reporting period.

	2015 USD profit transferred to members account	2014 USD profit transferred to members account
Currency - GB pounds		
+ 1 percentage point movement	2,204	2,317
- 1 percentage point movement	(2,204)	(2,317)
Currency – Naira	6,240)	6,299
+ 1 percentage point movement	(6,240)	(6,299)
- 1 percentage point movement		

##### (i) Price risk

Price risk is the risk that the pool will be adversely affected by changes in prices, in relation to investments in instruments such as equity shares or marketable securities. The pool does not hold any quoted shares or marketable securities which are susceptible to changes in prices.

##### (ii) Interest rate risk

Interest rate risk is the risk that the pool will be adversely affected by changes in interest rates of amounts borrowed or invested. The pool has invested in short deposits.

The interest rates vary from time to time depending on the prevailing economic circumstances. To minimise the exposure, the pool closely monitors the interest rate trends to minimize the potential adverse impact of interest rate changes.

The table below summarises the exposure to interest rate risk at the end of each reporting period.

	2015 USD	2014 USD
Financial assets		
Short term deposits	1,869,503	1,493,220

*Interest rate risks – increase/decrease of 1% in Net Interest Margin*

An increase/decrease of one percentage point in interest yields would result in additional profit/loss for the year of USD 18,695 (2014 – USD 14,932) investment income in the Pool.

A one percentage point increase or decrease represents management's assessment of the reasonably possible change in interest rates.

# AFRICAN AVIATION POOL

## NOTES TO THE FINANCIAL STATEMENTS (Continued)

### 11 FINANCIAL RISK MANAGEMENT (CONTINUED)

#### b) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Pool is exposed to credit risk through its financial assets, which include short-term bank deposits, fixed income securities and receivables.

Short-term bank deposits are placed with financial institutions of very high credit rating and are spread over a number of them to avoid undue concentration. The pool's financial regulations prescribe minimum acceptable credit rating and maximum allowable exposure to any single counter-party.

The pool's fixed income portfolio is managed through use of prudent standards of diversification and rating quality of issues and issuers. Specific provisions limit the allowable holdings of a single issue and issuer and industry or sector. This is to minimise significant concentration risk associated with the fixed income portfolio.

Credit risk relating to receivables is mitigated by the large number of cedants and their dispersion across the continent. A significant number of the companies from whom receivables are due are equally members of the pool. In addition, the liability for outstanding claims is in respect of insurance contracts with the same counter parties. Receivables are presented at present value net of impairment provision. A periodic evaluation of cedants and retrocessionaires is carried out to minimise exposure to significant losses from insolvencies. Transaction terms are also strictly monitored to keep balances as current as possible.

The amount that best represents the pool's maximum exposure to credit risk as at 31 December is made up as follows:

	Fully Performing USD	Past Due USD	Impaired USD	Total USD
<b>31 December 2015</b>				
Amount due from ceding companies	10,817,151		163,559	10,980,710
Short term deposits	1,869,503			1,869,503
Bank balances	277,399			277,399
	<hr/>	<hr/>	<hr/>	<hr/>
	12,964,053		163,559	13,127,612
	<hr/>	<hr/>	<hr/>	<hr/>
<b>31 December 2014</b>

## NOTES TO THE FINANCIAL STATEMENTS (Continued) FOR THE YEAR ENDED 31 DECEMBER 2015

### 11 FINANCIAL RISK MANAGEMENT (CONTINUED)

#### (c) Liquidity risk

Ultimate responsibility for liquidity risk management rests with the management board, which has built an appropriate liquidity risk management framework for the management of the pool's short, medium and long term funding and liquidity management requirements. The pool manages liquidity risk by maintaining adequate reserves and banking facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The following table analyses the pool's financial liabilities that will be settled on a net basis into relevant maturity groupings based on the remaining period at the end of each reporting period to the contractual maturity date. The amounts disclosed in the table below are the contractual undiscounted cash flows.

	Up to 1 year USD	1-2 years USD	2-3 years USD	3-4 years USD	4-5 years USD	Over 5 years USD	Total USD
